

# Jiffy® Steamer Model J-4000® Wiring Instructions

Worldwide Leader in Steaming Equipment Since 1940

*Engineered to last.*

## Wiring Instructions

Insure that the power cord is unplugged from the electrical outlet before removing the bottom plate or attempting to repair your Jiffy® Steamer. Please note, the Switch Terminal Numbers and the Switch Terminal Letters are marked on the actual switch.

- 1) Neutral wire #1 (white wire from the cord set bundle) attaches to "A" marked on the GE #ASR3282-05 rotary power switch.
- 2) Positive wire #2 (black wire from cord set bundle) attaches to "B" marked on the GE #ASR3282-05 rotary power switch.
- 3) Ground wire #3 (green wire from cord set bundle) attaches to the aluminum steamer housing.
- 4) Ground wire #4 (green wire from electrical control) attaches to the aluminum steamer housing.
- 5) The double white wire #5 connects from Switch Terminal Number 4, as follows:

- The 5A leg of the double white wire #5 connects to the terminal pin on the right side of the R34 electrical control, which is the one nearest to the ground wire.
- The 5B leg of the double white wire #5 connects to either side of the red pilot light.

- 6) Blue wire #6 connects Switch Terminal Number 1 to the top side of the L-170 PREHEAT thermostat.

- 7) Triple yellow wire #7 connects from the bottom side of the L-170 PREHEAT thermostat, as follows:

- The 7A leg of the triple yellow wire #7 goes to Switch Terminal Number 2.
- The 7B leg of the triple yellow wire #7 goes to the red pilot light.
- The 7C leg of the triple yellow wire #7 goes to the left side of the R34 electrical control.
